

BT-15 HD MOD2

11.5 Semi Auto

B&T USA's BT-15 HD MOD 2 is our enhanced, ambidextrous, forged AR-pattern 5.56 rifle, featuring an 11.5- or 16-inch barrel. Improving upon the Hodge Defense MOD 2 Carbine, the BT-15 HD MOD 2 utilizes Hodge's S-lock handguard, precision fit to the upper receiver. This design mitigates any appreciable rail flex and is fully compatible with the M-Lok accessory suite.

The tuned mid-length gas system for the BT-15 MOD 2's 16-inch barrel offers a mild recoil impulse and flawless functionality with or without a suppressor—and without the complexity and failure point of an adjustable gas block. The enhanced bolt is constructed of 9310 alloy steel and is QPQ-coated for lubricity and expanded bolt life by lowering the friction coefficient between the barrel extension and bolt, while also minimizing friction on the back of the lugs during extraction.

The cold hammer-forged chrome-lined barrel is free-floating and thermally fitted to the upper receiver. This match-grade barrel utilizes a constant taper profile and is optimized for use with M855A1 EPR ammunition.

- H2 Tuned Buffer
- Fully Ambi Lower Receiver
- 11.5" Cold Hammer Forged Chrome Lined Barrel
- Pinned Low Profile Gas Block
- Carbine Length Gas System
