

BT-15 HD MOD1

16 Semi Auto

The BT-15 HD MOD1 is B&T USA's introductory AR-pattern 5.56 rifle. Improving upon the Hodge Defense MOD 1 Carbine, our BT-15 utilizes Hodges' pinch-lock handguard, which provide precise fitting to the upper receiver. This minimizes any appreciable rail flex, and the design is fully compatible with the M-Lok accessory suite.

The BT-15 MOD1's tuned mid-length gas system with either a 16- or 14.5-inch barrel offers a mild recoil impulse and flawless functionality with or without a suppressor. The 11.5-inch- barreled option uses a carbine-length gas system engineered for reliability without the added complexity and failure point of an adjustable gas block. The enhanced bolt is constructed of 9310 alloy steel and is QPQ-coated for lubricity and expanded bolt life by lowering the friction coefficient between the barrel extension and bolt, while also minimizing friction on the back of the lugs during extraction.

The cold hammer-forged chrome-lined barrel, available in 11.5-, 14.5-, and 16-inch lengths, is free floating and thermally fitted to the upper receiver. These match-grade barrels utilize a constant taper profile and are optimized for use with M855A1 EPR ammunition.

- H2 Tuned Buffer
- Staked Castle Nut
- 16" Cold Hammer Forged Chrome Lined Barrel
- Pinned Low Profile Gas Block
- Mid-Length Gas System
